Troubleshooting

Heart-rate signal missing

The Zewa SW1 smart watch keeps track of your heart rate during exercise and daily life. Sometime the watch may not get a suitable heart rate signal. At this time, the missing heart rate data will appear at the dotted line. If you can't get the heart rate signal, first you should confirm that you wear the watch correctly, adjust it to avoid being too high or too low, neither too tight or too loose on your wrist. After adjustment, turn on real-time heart rate monitoring to get the data.

If there is still no heart rate data, check if the heart rate monitoring function is turned on at Zewa Fit Pro APP.

Other problems

If your mobile cannot pair the watch, click Settings Bluetooth in your mobile and check if there is signal of Zewa SW1. If yes, it means there is no problem with the Bluetooth signal. Please check if the watch is paired with other phones, please unbind it. IOS device users should click Setting - Bluetooth - ignore this device and then pair it.
